

1) Binário para Decimal:

- $00011011 = 27$
- $10101010 = 170$
- $01101111 = 111$
- $11111000 = 248$
- $00100000 = 32$
- $01010101 = 85$
- $00111110 = 62$
- $00000011 = 3$
- $11101101 = 237$
- $11000000 = 192$

2) Decimal para Binário (8 bits):

- $238 = 11101110$
- $34 = 00100010$
- $123 = 01111011$
- $50 = 00110010$
- $255 = 11111111$
- $200 = 11001000$
- $10 = 00001010$
- $138 = 10001010$
- $1 = 00000001$
- $13 = 00001101$
- $250 = 11111010$
- $107 = 01101011$
- $224 = 11100000$
- $114 = 01110010$
- $192 = 11000000$
- $172 = 10101100$
- $100 = 01100100$
- $119 = 01110111$
- $57 = 00111001$
- $98 = 01100010$
- $179 = 10110011$
- $2 = 00000010$

3) Identificação de Classes:

- 10.250.1.1: Classe A
- 150.10.15.0: Classe B
- 192.14.2.0: Classe C
- 148.17.9.1: Classe B

- 193.42.1.1: Classe C
- 126.8.156.0: Classe A
- 220.200.23.1: Classe C
- 230.230.45.58: Classe D - Multicast
- 177.100.18.4: Classe B
- 119.18.45.0: Classe A
- 249.240.80.78: Classe E - Experimental
- 199.155.77.56: Classe C
- 117.89.56.45: Classe A
- 215.45.45.0: Classe C
- 199.200.15.0: Classe C
- 95.0.21.90: Classe A
- 33.0.0.0: Classe A
- 158.98.80.0: Classe B
- 219.21.56.0: Classe C

4) NetID e HostID:

Negrito = REDE, restante é HOST)

- **177.100.18.4** / 10.15.123.50
- **119.18.45.0** / **171.2.199.31**
- **209.240.80.78** / **198.125.87.177**
- **199.155.77.56** / **223.250.200.222**
- **117.89.56.45** / 17.45.222.45
- **215.45.45.0** / 126.201.54.231
- **192.200.15.0** / **191.41.35.112**
- **95.0.21.90** / **155.25.169.227**
- **33.0.0.0** / **192.15.155.2**
- **158.98.80.0** / **123.102.45.254**
